

Harrier™ Controllers

Electronic Chemical Injection Rate Controllers

- Need a more accurate way to dispense chemicals?
- Are you constantly changing batteries?
- Do you know your annual cost per year on chemical usage?
- How often do you go to the well site to check on your pumps?
- Are you looking for ways to reduce your operating costs?

You may be spending more than you thought! Check out Graco's Harrier+ Controller and you won't have to worry about these questions or your chemical injection application.

Harrier Electronic Injection Rate Controllers

Unlocks features and capabilities that allow you to optimize your chemical usage saving you time and money!

How does it work?

The Harrier+ controls the injection rate via timing, cycle count or flow control. The controller:

- Uses patent pending, adaptive injection rate controls that provide accuracy of +/- 1%
 - The controls use sensors along with Graco software to adjust to changes in the application such as well pressure or battery voltage
- Controls and monitors your system remotely with a cellular connection and web app

Office or Remote Access

The Harrier+ control includes remote connectivity, allowing you to monitor, control and calibrate your system away from your injection site via cellular or or SCADA connection. You don't have to be on site – monitor your system from your cell phone!

- Operates remotely
- Receive maintenance notifications and alarms
- Easily generate chemical usage reports

Monitor your Harrier+ controller right from your cell phone!

Call Graco at 866.552.1868 or emailing us at oilandgas@graco.com to select a pump for your application!
